

# Ascon Qube

A single, intelligent automation platform that lets you plan, build, monitor and control your entire production chain with high performing digital twins.

Manufacturing is changing rapidly. Your automation needs to keep pace.

Global competition is pressuring manufacturers to reduce costs. Supply chains are experiencing disruption. The rigid processes of conventional automation do not allow you to adapt fast enough.

Ascon Qube enables software-defined manufacturing for data-driven, agile and more efficient factory of the future.

### Increased Agility

Low-code process modelling means faster time-to-market.

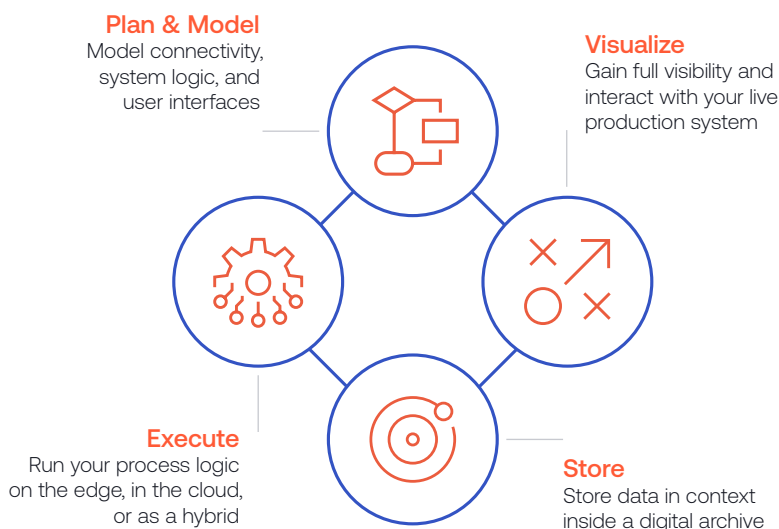

### Full transparency

Complete and aggregated production data means better traceability and saving potentials.

### Optimize CAPEX, OPEX and OEE

Identify a multitude of optimization opportunities to stay competitive and profitable.

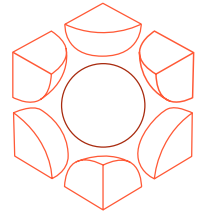

Ascon Qube is an **edge-to-cloud automation platform** that lets you break free from hard-coded PLCs and integrate heterogeneous landscapes. Live-synced **digital twins** deliver complete transparency and an interface to execute **low-code changes**.

Ascon System's **Software-defined manufacturing** solution enables a data based, more flexible and efficient production.

Some of the most advanced manufacturers in the world are already in the Qube

# The only complete platform for next-gen industrial automation

“Now you can run and optimize your factory like a data center.”

Markus Knaup, Chief Product Officer / Ascon Systems

End-to-end data transparency enables industrial process automation. In-depth data analytics show optimization potential in live operations to increase OEE and reduce costs.

## Start small, or go big

Virtualize anything in Ascon Cube including an entire manufacturing chain. Or, start with a single process and increase granularity as you go.

- ✓ Scalable
- ✓ Independent
- ✓ Open standards
- ✓ Secure

## Transformational Services

The consulting framework for manufacturers seeking a quantum leap in efficiency. Benefit from an easy onboarding, a clear vision and roadmap and constant support and guidance on your transformational journey towards a more agile, resilient and efficient production.

## What does the Qube hold for you?

Our automation experts would love to hear about your challenges and priorities. Get in touch today and explore a new path to the factory of the future.
